

MobiCare

Anti-decubitus air cushion system designed for mobility
Compatible with any Carilex's power unit
Favorable for patients in sitting position

"MobiCare" is the mobilized air alternating pressure relief cushion designed to provide the same therapeutic function on the go without compromise. Besides MobiCare's standard equipped power unit, it is also connectible with any other Carilex power units to perform therapy for pressure ulcer prevention and treatment while patients need the therapy from bed to chair. MobiCare is a great accessory to go with any Carilex anti-decubitus air mattress system to provide patients a full range of choices under any environments.
